DETAILED ACTION

Claims 1-48 are pending in the instant application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 8-12, drawn to a method of producing a non-human mammalian embryo and a non-human mammal, classified in class 800, subclass 14.
- II. Claims 7, 13-39, 40-43, and 46-48, drawn to a method of producing a mutant mouse embryo and a mutant mouse, classified in class 800, subclass 18.
- III. Claims 44 and 45, drawn to a method of producing XO F1 ES cells, and an XO female mouse, classified in class 800, subclass 18.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are drawn to methods of producing non-human mammals and mutant mice respectively. They require materially different protocols and are thus distinct. Inventions I and III are drawn to production of different types of animals (a non-human mammal vs. an XO female mouse) and thus require materially different methods and are distinct.

Inventions II and III are drawn to the methods of producing different types of mice and are thus, distinct.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and

Art Unit: 1632

because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
